

# ePropertyWatch™

ePropertyWatch, a resource provided by CVR MLS, is a retention tool that delivers home and neighborhood insights to former clients. ePropertyWatch generates a monthly email report of a consumer's current home value, equity, price trends, recent sales and foreclosures in the neighborhood, building permits and more. Emails are personalized with data for each consumer and branded with your agent information. With this continued contact with former clients, you are able to retain their business when they decide to list their homes.

Training on ePropertyWatch is available in this reference guide and includes the following:
